

CULATOR®

WATER METAL REMOVAL

Manual

1. Insert the "magic" CuLator® pouch into the skimmer or pre-filter
2. Press it into the water to let the air out
3. Allow the water to circulate continuously for 24 to 48 hours
4. Each CuLator® bag reduces the total metal concentration by 0.4ppm for each 37m³ of pool water
5. After one month, remove the bag
6. Check if the bag is coloured with any of the colors in the table below to see which metal it has trapped
7. Discard it and place a new one if necessary

Metal	CuLator® Colour
Copper	Light Blue
Iron	Light yellow / orange
Cobalt	Pink / brown
Silver	Gray / black
Manganese	Colorless
Nickel	Light green / blue-green
Lead	Colorless

Depending on the metal trapped, CuLator® acquires a coloration
